

Dilmar Oil Company

Transmissionguard Automatic Transmission Fluid

Automatic Transmission Fluid

Product Description

Dilmar Transmissionguard Automatic Transmission Fluid is a premium quality automatic transmission fluid for use in both passenger cars and light duty trucks requiring a fluid that was previously serviceable by the General Motors DEXRON® III or Ford MERCON® specifications.

Transmissionguard ATF is recommended for power steering units specifying either type of fluid, and can be used in Allison Powershift transmissions or other torques converters requiring an Allison C-3 or C-4 fluid. The product is a high viscosity index product and offers good oxidation stability, corrosion prevention, foam resistance, and controlled frictional properties. Additionally, it provides good seal compatibility, wear protection and smoother shifting.

Typical Properties:

SAE Grade	<u>5w-20</u>
Color	Red
Viscosity, cSt	
@ 40° C	39.2
@ 100° C	7.10
Viscosity Index, minimum	145
Brookfield Visc. @-40° C, cP	16,850
Pour Point, °C	-36
Flash Point (COC), °C	212
