

## MSA - KOR 50

Corrosion Preventive

### Product Information

**MSA - KOR 50** is a mineral-oil based corrosion preventive for the temporary protection of work piece and machine parts.

**MSA - KOR 50** contains base oils with low aromatic content, natural fatty components and oils in combination with alkaline earths sulfonates. The balanced additive combination provides protection for steel and cast iron during indoor and shed storage for several months.

**MSA - KOR 50** will be applied by immersion or spraying.

**MSA - KOR 50** is soluble in oils and compatible with most manufacturing processes. Therefore, it is often not necessary to remove **MSA - KOR 50** prior to metal working operations.

Work piece produced with **MSA - KOR 50** can easily be degreased with conventional alkaline industrial cleaners. For best results, we recommend the use of our **PURGON** industrial cleaners.

### Technical Data

Appearance	light brown, low-viscous liquid
Specific gravity 15°C	899 kg/m <sup>3</sup>
Viscosity 40°C	55 mm <sup>2</sup> /s
Flash point (COC)	205°C

### Storage

During storage **MSA - KOR 50** should not be exposed to temperatures below 0°C or above 40°C. Large temperature fluctuation has also to be avoided. It should be brought to room temperature prior to usage.

### Health and Safety

Please refer to the Material Safety Data Sheet for complete information.
