

Industrial Division

Dilmar Oil Company offers a full line of industrial lubricants and Schroeder Filters to meet the unique demands of your plant. We offer top brands of cutting oils, ferrous & non-ferrous compounds, hydraulic, way, and gear oils, greases, and other products such as cleaners, quenching fluids, & rust inhibitors to best assist with all your lubricant needs.

We provide custom blends to fit each specific need rather than selling products that are close to or more than what a situation requires.

Specialties

- Metal Working Lubricants
- Industrial Lubricants
- Fluid Reclamation
- Equipment Programs
- Oil Analysis

IRM - Industrial Reliability Management

An exclusive Dilmar Oil Company service which combines a team of STLE certified lubricant specialists (CLS) and technical advisors who focuses on all aspects of equipment reliability to help US manufacturers improve production output, reduce equipment downtime, and lower the total cost of operation. This program was designed to help manufacturing professionals overcome today's challenges to remain competitive within the global economy. We offer a full suite of services designed to advance your equipment reliability and improve your operation.

Premium Services

We offer a no-charge Site Assessment and Fluid Analysis Audit to highlight areas of opportunity to reduce usage, consolidate coolants and fluids, as well as offer comparable and compatible material at a lower cost. We also offer on-site and off-site reclamation.

OTHERS:

- Lube Surveys
- Bulk Tank Audits
- Gear Inspections
- Oil Analysis Program
- Energy Audits
- Contamination Control
- Lubrication Training
- Equipment Failure Analysis
- Maintenance Programs

- **Reduce new oil purchases up to 90%**
- **Reclamation typically cost 40-60% cost of new oil**
- **Lower overall oil cost for the reclaimed product**
