Synthetic Global MV ATF

Dilmar Synthetic Global MV Automatic Transmission Fluid is a synthetic universal automatic transmission fluid specifically designed for passenger car and light duty trucks to meet the performance requirements and stability for use in the vast majority of today's modern fuel efficient transmission (6 or more speeds). Its performance features can also be realized in the vast majority of older transmission applications. This product eliminates the need to stock multiple brands and types of transmission fluids that are in service today.

Features and Benefits

- Longer equipment life; specially formulated for extra wear control, corrosion protection formation of lacquers, sludge or other harmful deposits.
- Designed for modern fuel efficient transmissions as well as older transmissions.
- Improved performance vs. Dexron® III:
 - Friction Stability
 - Clutch Durability
 - Oxidation Resistance
 - Foaming Resistance
 - Wear Control
 - Corrosion Control
- Controls seal deterioration to limit fluid leakage.
